

## JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora embarked on a cross country trip in their RV. Recently retired, after spending numerous years working with his brother to build their crane company into a market leader, John had no idea that important trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling equipment was the end consequence of a road trip.

While on their journey, John spent time conversing with previous business associates whom the Groves stopped to visit along the way. These conversations combined with a tragic occurrence-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John discovered a substantial market for a product that could promptly and safely lift individuals in the air to accomplish upkeep and other construction functions.

After returning from their vacation, John set up a business with two of his friends and obtained a metal fabrication business in McConnellsburg, Pennsylvania. Starting with a small crew of twenty employees, they fashioned and sold their first JLG aerial work platform in 1970. The business incorporates some of the simple design essentials of that original lift into current versions.

JLG lift trucks have come a long way from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the first aerial work platform debuted on the market. Today, the company proudly continues to expand itself into numerous marketplaces worldwide and develops new products to ensure consumers are capable of being more efficient and perform in the workplace within a safer environment.
