

Meritor Part

Meritor Parts - The Meritor Company is a leading global supplier established upon 100 years of custom of quality and service. Meritor specializes in integrated systems along with different modules and components to the original machine manufacturers and aftermarket equipment within the transportation and industrial sectors.

Meritor values the requirements of their customers to guarantee their success while priding itself in the company's unique energy and feels this output of energy to be their competitive advantage in their global operations. Meritor starts with a tradition that values diversity of people and their broad thought processes. Operating in 19 nations and hiring more than eleven thousand two hundred individuals, Meritor encourages innovation and collaboration among a team of knowledgeable professionals.

By only employing future focused staff, Meritor strongly feels these top-caliber workers would be able to quickly adapt to changing environments and exhibit the commitment and performance needed in order to achieve results in the competitive materials handling market. The business empowers their teams to make sound business decisions so as to improve the overall success of the company. In return, Meritor provides their staff different chances for professional and personal development.

The Advanced Engineering team is on the forefront of components and system engineering. This includes drivelines, axles, suspension and braking systems intended for heavy duty and medium trucks, trailers, off-highway vehicles, buses and military vehicles. The Meritor Advanced Engineering team is developing. They opened a new technical center in Bangalore, India in September 2009 so as to lead their advanced product development initiatives that represent the entire Asia Pacific region. This particular team is even responsible for supporting the needs of all their international engineering staff.

The Quality team at Meritor is a customer-focused and dynamic group that is committed to ensuring optimum growth at their production plants and aftermarket distribution facilities that are located on 5 continents and in 19 nations.

They have their supplier network that is specially located so as to support the development of the business. Every regional team has globally supported initiatives, quality systems and centralized in Materials Engineering and Six Sigma. Meritor's growing Six Sigma program encourages a fact-based, data-driven method to decision making within each part of the business. The DFSS or otherwise known as Design for Six Sigma ensures product reliability within each region. The team is even comprised of transactional Green Belts who apply Six Sigma tools to business techniques and apply lean methods.
